

Delnorte Holdings inc. is a tech company that uses web3, blockchain and quantum technology to securitize documents

Our project is focused on tokenizing assets and getting the authoritative bodies to verify the validity and ownership of that asset. Our target user is anyone who wants to tokenize his asset, authenticate and securitize its ownership and monetize it.

Delnorte is the only blockchain proptech product company in the world that develops hardware-based asset processing and property ownership through a management transaction endorsement protocol.

Chief Blockchain Development

Problem

In many LAC countries 6 out of 10 rural properties are informally owned, owners have no land titles or registered records to prove the land is theirs. It also means the land parcel does not appear in the country's land cadaster. This becomes an obstacle for economic development and poses long-term security risks where violence and internal displacement are commonplace.

Opportunity

Everyone can view a municipality's registry in a secure efficient manner protecting all participants from fraud, reducing theft and spurring regional economic development.

Solution

Delnorte is a hybrid hardware & software ecosystem that utilizes blockchain technology and provides various solutions to cover a variety of financial transactions, data security, data storage and data processing.

Why Invest?

1. Ready to expand as a multiregional and multilanguage platform
2. Highly qualified multidisciplinary team

Advantage

1. Cost effective digital transformation strategy
2. Provides a free of cost transformation to municipalities
3. Reduces fraud and theft

Target Market

1. Local citizens between the ages of 22 & 45, who are familiarizes with social networking & digital
2. Companies that organize group activities who want to attract more customers.

Business Model

1. Monthly Service Fee of \$10
2. Selling custom platform for corporate users

Achievements

1. Global patents for DTV Tech secured
2. Contract for Comayagua municipality in Honduras 100k+ Properties
3. Contract for San Barolome municipality in El Salvador 30k+ Properties
4. Caldwell Banker in Costa Rica study on 500 Properties
